

Detection Management Software DMS

Offering intuitive, flexible functionality for recording, reporting, charting and analyzing exposures to a variety of occupational and environmental hazards the Detection Management Software (DMS) program works with the full line of TSI® Quest™ data logging instruments.

Features and Benefits

User-friendly interface

- Intuitive operation, helpful icons and simple graphing tools enable efficient usage
- "Click, Drag and Drop" report-building for enhanced productivity
- Easy to learn and use without the need for extensive training
- Icon-driven navigation provides a simplified, convenient and enhanced user experience

Powerful tool for exposure data analysis

- Quickly create insightful charts such as; logged data with exceedance limit count, octave filter summary and more, to intuitively interpret your measurements
- Ready-to-use chart templates help generate reports to support safety program compliance
- Review Exposure Event Audio and Voice files when applicable
- Data retention and record keeping tools keep all exposure data files organized and personalized for your team

All-in-one software solution

- Single software license package for your entire organization
- Easily share data across regions and divisions for companies with multiple locations
- In-house built software platform allows for expedited technical support
- DMS is available on all TSI® Quest™ data logging instruments including:
 - Quest™ Edge Personal Noise Dosimeters
 - Quest™ SoundPro™ and Sound Examiner Sound Level Meters
 - QUESTemp° Heat Stress Monitors
 - EVM Environmental Monitors

Applications

- Noise dosimetry
- Octave band sound analysis/survey
- Industrial and community sound surveys
- Area and personal heat stress monitoring
- Thermal comfort monitoring
- Indoor air quality (IAQ) assessment

Specifications

Detection Management Software DMS
