

Join the Revolution in Real-Time Aerosol Monitoring

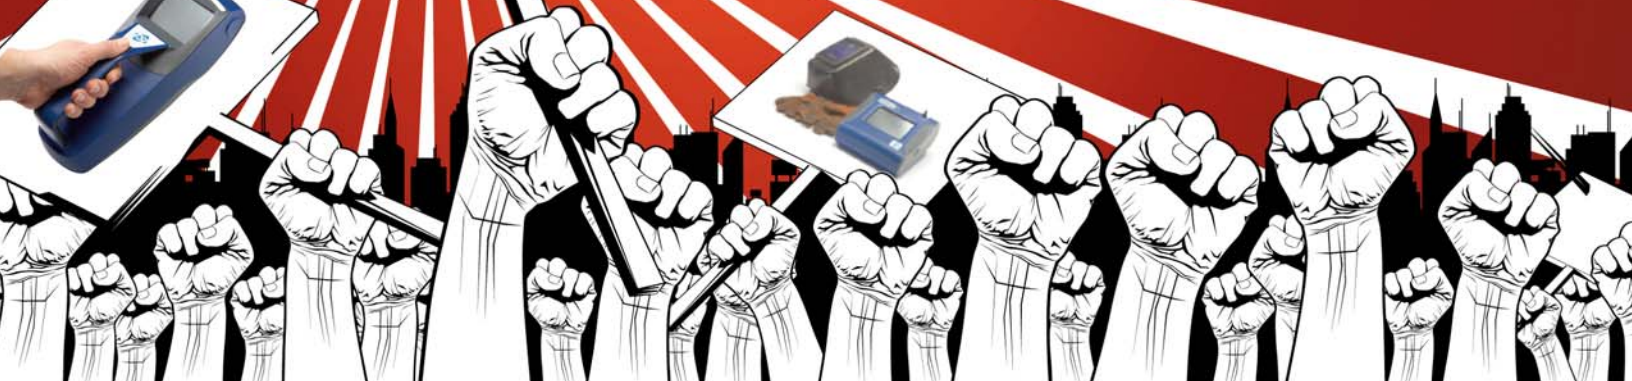

For a limited time, you can trade in any dust monitor for a credit towards the purchase of a new DustTrak™ II or DustTrak DRX Aerosol Monitor.

The new DustTrak II aerosol monitor brings easy to use and easy to program to another level. Whether it is a clean office environment, harsh industrial workplace or outdoor monitoring application, DustTrak II aerosol monitor is your solution.

The DustTrak DRX aerosol monitor is a new breed of laser photometer that simultaneously measures both mass and size fraction – something no other monitor can do.

Join the revolution in real-time dust monitoring – insist on the new DustTrak II and DRX Aerosol Monitors.
