Introducing DUSTTRAK II and DRX Aerosol Monitors

Shoreview, MN - TSI Incorporated announces the worldwide introduction of the [DUSTTRAK™ II and DRX Aerosol Monitors](#). The new DUSTTRAK II and DRX Aerosol Monitors are battery-operated, data-logging, light-scattering laser photometers that give you real-time aerosol mass readings.

These monitors measure aerosol contaminants such as dust, smoke, fumes and mists. They use a sheath air system that isolates the aerosol in the optics chamber to keep the optics clean for improved reliability and low maintenance. Suitable for clean office settings as well as harsh industrial workplaces, construction and environmental sites and other outdoor applications.

Ideal applications include industrial/occupational hygiene surveys, indoor air quality investigations, outdoor environmental monitoring, fugitive emissions monitoring, site perimeter monitoring, dust control operations, environmental research studies, baseline trending and screening, engineering control evaluations, point source monitoring, engineering studies, remote monitoring, process monitoring, emissions monitoring and aerosol research studies.

About TSI Incorporated

TSI Incorporated serves a global market by investigating, identifying and solving measurement problems. As an industry leader in the design and production of precision instruments, TSI partners with research institutions and customers around the world to set the standard for measurements relating to aerosol science, air flow, health and safety, indoor air quality, fluid dynamics and biohazard detection. With headquarters based in the U.S. and field offices throughout Europe and Asia, TSI has established a worldwide presence in the markets we serve. Every day, our dedicated employees turn research into reality. For more information on TSI Incorporated, visit our website: www.tsi.com, check out our page on Facebook: www.facebook.com/TSIIncorporated, or follow us on Twitter: www.twitter.com/TSIIncorporated.
