FOR IMMEDIATE RELEASE

January 1, 2009

TSI Gives Back to Health and Safety Community

Shoreview, MN - TSI Incorporated donated over \$250,000 in PortaCount Respirator Fit Testers to numerous University and College ABET-accredited industrial hygiene training programs. TSI realizes the importance of the future of Industrial Hygiene, EH&S and Industrial Safety and would like to recognize these programs and aid in their success. These fit testers will allow students to prepare for their graduation and transition into the Professional Health and Safety community.

The PortaCount Respirator Fit Tester quantitatively fit test all types of respirators. It is also a valuable training tool as part of a written respiratory protection program. The PortaCount fit tester can be used in real time fit test mode to show how to determine the optimal make, model and size of respirator for any individual. The real time fit test mode also trains the respirator user how to don a respirator for optimized fit.

Respiratory protection is a critical aspect of course work these programs offer and training on quantitative fit testing is an important part of their instrument lab class. Rick Fulwiler, faculty at a receiving University states, "TSI's thoughtful donation of PortaCount fit testers will enhance these educational and research programs."

About TSI Incorporated

TSI Incorporated serves a global market by investigating, identifying and solving measurement problems. As an industry leader in the design and production of precision instruments, TSI partners with research institutions and customers around the world to set the standard for measurements relating to aerosol science, air flow, health and safety, indoor air quality, fluid dynamics and biohazard detection. With headquarters based in the U.S. and field offices throughout Europe and Asia, TSI has established a worldwide presence in the markets we serve. Every day, our dedicated employees turn research into reality.
