**FOR IMMEDIATE RELEASE**

**February 15, 2010**

## **TSI Offers Total Fit Testing Solution. No Stress. No Mess. At the push of a button. Fit test done.**

Shoreview, MN - TSI Incorporated introduces a no stress, no mess qualitative fit testing solution. The [Qfit™ Respirator Fit Tester](#) is the only OSHA (29CFR1910.134) compliant automated nebulizer for BITREX® and Saccharin to qualitatively test the integrity of respirators.

At the push of a button, the [Qfit™ fit tester](#) generates a consistent test agent with a pump driven nebulizer utilizing pre-filled cartridges. The [Qfit™ fit tester](#) reduces solution clogging, minimizes repetitive stress disorders, and eliminates the nuisance of mixing, handling and refilling solutions.

The [Qfit™ Respirator Fit Tester](#) models are light weight, portable, and battery operated. Operating with either automatic and manual, the [Qfit™ fit tester](#) replaces the need to repetitively hand aspirate a rubber squeeze bulb by utilizing an integral pump to disperse sensitivity and fit test solutions. Both automatic and manual [Qfit™ fit testers](#) can be operated in either a handheld or remote mode.

TSI President Tom Kennedy states, “For 25 years, TSI has been the industry leader in respirator fit testing. TSI is dedicated to global occupational health and safety. With the release of a qualitative fit tester, TSI now offers a total fit testing solution. TSI still believes that quantitative fit testing is best, but the Qfit™ fit testers at least ensure consistent application of qualitative fit testing.”

Easy... Accurate... Reliable... TSI, your total fit testing solution.

### **About TSI Incorporated**

TSI Incorporated serves a global market by investigating, identifying and solving measurement problems. As an industry leader in the design and production of precision instruments, TSI partners with research institutions and customers around the world to set the standard for measurements relating to aerosol science, air flow, health and safety, indoor air quality, fluid dynamics and biohazard detection. With headquarters based in the U.S. and field offices throughout Europe and Asia, TSI has established a worldwide presence in the markets we serve. Every day, our dedicated employees turn research into reality.
