Trusting PortaCount: The One Fit Test for Any Respirator

Simplify your fit test program with one consistent and objective fit testing experience across any respirator you use. SCBA masks, Air Purifying Respirators (APRs) for post-burn overhaul, and N95s for medical calls can all be fit tested with the PortaCount platform.

TRUST PORTACOUNT: THE ONE FIT TEST FOR ANY RESPIRATOR

Achieve a better fit and a more productive you

The new PortaCount® Respirator Fit Tester features intelligent touchscreen solutions, providing assistance across your entire respiratory protection program from training through compliance.

Choose the industry’s most trusted fit tester to increase your staff’s safety, while new software and features improve your program’s efficiency and productivity.

FIT TEST FOR THE RIGHT REASON

Respirator fit testing is about more than compliance with standards or about “checking the box” as quickly as possible, it's about safety. Staff working in dangerous environments deserve the very best protection possible from a respirator.

PortaCount Fit Testers deliver safety by utilizing the most effective quantitative fit testing method available to identify poor-fitting masks. Industry-first features train staff how respirators should be worn to be most protective.

Choose PortaCount Fit Testers for respirator training and fit testing you can trust.
REAL-TIME MEASUREMENTS

Real-time measurements not only allow you to quickly find the correct size mask, but also provide the people in your department with a greater understanding of how and when their respirator best protects them.

REAL-WORLD SAFETY

Real-world measurements evaluate respirator fit during actual movement, breathing and talking; providing an accurate reflection of how a respirator will protect staff on the job.
YOUR GUIDE TO A BETTER FIT TEST

FITCHECK MODE™
Utilize a real-time radial display or live graph to show how a respirator’s fit changes throughout donning and adjustment. Real-time FitCheck Mode allows you to quickly identify the right mask and provide staff with a better understanding of how their respirator fits. Instant fit feedback reduces failed fit tests and allows you to achieve a better fit in less time.

FEWER STEPS TO A FIT TEST
Starting a fit test is easy, simply complete the “Assign Person” screen and push “Start.” The instrument does the rest. A simplified interface means a more user-friendly experience and an efficient use of your time.

ANIMATIONS FOR A BETTER FIT
Video animations guide staff through the proper movements for each fit test exercise, better identifying respirators that fit poorly. Video animations free administrators from the need to coach staff through the fit test, ensuring consistency and allowing time to multitask for increased productivity.

QUANTIFYING RESULTS, AUTOMATING DOCUMENTATION
FitPro™ Ultra Fit Test Software automatically records test results to a database that is simple to manage and share. PortaCount Fit Testers assist with administrative tasks beyond the fit test, allowing you to get more accomplished with your time. Documenting your program’s compliance has never been easier.
FITPRO™ ULTRA SOFTWARE
FIT TESTING REIMAGINED

TSI has redesigned every aspect of FitPro Ultra Software to improve the user experience and create the most powerful fit test software available. From touchscreen tablets to PC laptops, FitPro Ultra Fit Test Software is easy to use and is similar in design to applications you use every day on your own personal devices.

DEVICE FLEXIBLE

FitPro Ultra Software is compatible with Windows® tablets* and laptops**. Android™ and iOS® support is to come.

* FitPro Ultra compatible with tablets running versions of Windows 10 and newer.
** FitPro Ultra compatible with laptops running versions of Windows 7 and newer.

FITPRO ULTRA SOFTWARE
Free and included with instrument purchase

Fit Testing
